Welcome to UNSW Medicine. As one of the world’s top medical schools, our aim is to support and develop our students, our clinicians and our researchers to be leaders and innovators, in order to improve health. We attract brilliant students from across the globe who collaborate with our world-leading researchers and clinicians to translate knowledge into breakthrough treatments and cures that directly benefit our communities.

At UNSW Sydney, we have the opportunity to work closely with some of Australia’s finest hospitals, research institutes and healthcare organisations. These partnerships and our collective capacity allow us to continuously improve the way medicine is learned and how it is practiced. We are constantly evolving, analysing the way modern healthcare is delivered and capitalising on new health technologies and insights to integrate them into our courses, research and clinical environments.

At UNSW Medicine’s School of Women’s & Children’s Health, we welcome you to our global community. As a graduate, you will contribute to the effective, efficient and equitable delivery of care to women and children at a local, national and global level. We are committed to helping you develop the knowledge, skills and values necessary to make a difference.

Scientia Professor Vlado Perkovic
Dean, UNSW Medicine
Welcome to this prospectus which outlines the courses available to you if you wish to apply to University of New South Wales for postgraduate programs in Reproductive Medicine and Women’s Health Medicine. Our programs in Reproductive Medicine were established over a decade ago and have a proven track record in providing postgraduate level education across all subjects relevant to study of reproductive medicine. The candidates for this course include clinicians, fertility nurses, embryologists, researchers and complementary medicine practitioners, along with representatives from pharmaceutical industry and other healthcare associated disciplines. We receive consistently excellent feedback concerning the course content and teaching methods, in particular the practical relevance of the course for those wishing to pursue a career in areas related to reproductive medicine. The Postgraduate Board of the School of Women’s & Children’s Health at UNSW Sydney supervises our process of continual updating and refreshing of the various modules, in keeping with the rapid pace of change in our field. As the uptake of ART around the world continues to increase, with over 8 million births and over 20 million cycles of IVF having now been completed, the applicability of this course to clinical and allied practice is obvious. The prospectus includes information about the career pathways followed by some of our graduates, and the successes they have enjoyed.

The Women’s Health Medicine programs were developed more recently and have already proven popular amongst a number of disciplines. The broader range of content reflects the breadth of knowledge required for expertise in Women’s Health, with areas covering all aspects of the field from problems pre-conception through pregnancy, childhood and adolescence and throughout adult life to menopause and beyond.

The team of clinical and laboratory based academics, teachers and researchers who have written and teach these modules are drawn from the staff of the School of Women’s & Children’s Health at UNSW Sydney, along with colleagues from allied disciplines. The publication record of these individuals demonstrates the quality and skill mix of our team. Many are in active clinical practice in disciplines as diverse as obstetrics, gynaecology, reproductive medicine, gynaecological oncology, primary care, medico legal advocacy. Our connections with the real world of “hands on” medicine brings validation across all the courses on offer. We hope you find something interesting and stimulating in our prospectus and would be happy to discuss your plans further with you.

Professor William Ledger
Head, Discipline of Obstetrics & Gynaecology,
UNSW School of Women’s and Children’s Health, UNSW Sydney
Director of Reproductive Medicine, Royal Hospital for Women Randwick, Australia
2006
When the Reproductive Medicine course started at UNSW

2013
When Women’s Health Medicine started

Previous Undergraduate Degree of our Students:
Acupuncture, Allied Health, Applied Science, Biotechnology, Embryology, Engineering, Health Admin, Health Science, International Health, Naturopathy, Nursing, Medical Science, Medicine, Science, Physiology, Public Health

Age at commencement
Age Range: 21-70

Duration of study
Average years taken to complete the master program: 2.5 years

This map represents the students’ country of origins
Reproductive medicine is at the forefront of emerging medico-scientific technology, offering hope to many needy couples, and career opportunities to those with demonstrable skills and knowledge.

This is not a gynaecology course; it is an opportunity for those with a special interest to study in a very flexible environment. The list of course options available appears in this Prospectus and you will see that there are opportunities to round out one’s postgraduate education with innovative elective courses.

In 2020 we are offering twelve courses and, consistent with the delivery mode, assessment is done online with electronically-marked multiple choice questions, online discussion forums and scheduled assignments.

For each course students should allow 6-10 hours per week over the 10-week term for reading, research, online discussions, assessments and assignments.

All you need is the desire, the time and access to a computer.

Prof Michael Chapman
Program Coordinator of Master in Reproductive Medicine
The entry requirement for the programs above is an undergraduate degree in medicine, nursing, health or medical science and:

- an Honours, Graduate Certificate, Graduate Diploma or higher qualification in medicine, nursing or health or medical science; or
- commencement of a recognised postgraduate medical specialist training program (e.g. general practice, obstetrics & gynaecology); or
- 1 year full-time equivalent of postgraduate professional experience in medicine, nursing, health or medical science.

**Minimum entry requirements**

Credit for courses completed as part of the GradCert and the GradDip can be transferred to the MRM program, in accordance with the UNSW policy on credit transfer.

“...On the completion of the Master, you would expect a clearer understanding of the science, ethics and clinical application surrounding Reproductive Medicine. Personally I found this course to be a pertinent platform in my career thus far. I would highly recommend this course to my newly graduate medical colleagues and other junior (and not-so-junior) doctors...”

Dave Listijono  
O&G Registrar
Introduced in 2013, we hope that this new program provides an opportunity for those with a general interest in Women’s Health to expand their knowledge within a very flexible study environment.

It is anticipated that such a program may be particularly useful to family physicians, but that it will also have some appeal to other professionals such as Women’s Health nurses, midwives and medical scientists.

All courses in this program are delivered in a distance-learning format. It is difficult to give an exact estimate of the time commitment required but generally participants should allow 6-10 hours per week over the 10-week term for reading, research, online discussions, assessments and assignments.

There are three terms each year and a range of different courses will be offered in each term.

Dr Terri Foran
Sexual Health Physician
Program Coordinator of Master in Women’s Health Medicine

“I thoroughly enjoyed studying the Master online at UNSW … a wide variety of subjects are offered and I found the subjects relevant to my work as a GP… the course was easy to navigate online… I am happy to say that I have been impressed by this course and UNSW.”

Rimona Burke
General Practitioner
Entry into our programs is based on the following criteria:

An undergraduate degree in medicine, nursing, health or medical science and:

• an Honours, Graduate Certificate, Graduate Diploma or higher qualification in medicine, nursing or health or medical science; or

• commencement of a recognised postgraduate medical specialist training program (e.g. general practice, obstetrics & gynaecology); or

• 1 year full-time equivalent of postgraduate professional experience in medicine, nursing, health or medical science.

We have two intakes in a year, which are Term 1 and Term 3.

Applications can be made online at applyonline.unsw.edu.au/login

The following information should be submitted with the application form:

• Your Curriculum Vitae

• Employer-provided statement of service

• Originals or certified copies of your academic record and proof of completion of previous degree

English language requirements

If English is not your first language, or if you did not complete an assessable qualification of at least one year of duration at a university or other post-secondary educational institution within the last two years where the medium of instruction is in English, you’ll need to provide evidence to show that you meet the University’s English Language Requirements. Visit unsw.edu.au/english-requirements-policy for more information.

Closing date for applications:

• End of December for Term 1 commencing mid-February

• End of July for Term 3 commencing mid-September

• Late applications will be considered

### FEE-HELP

FEE-HELP is an Australian Government loan to assist full fee paying students to help pay part or all of the tuition fees. FEE-HELP is available to students who are Australian citizens or Australian permanent residents with a humanitarian visa. For more information on FEE-HELP, visit [studyassist.gov.au](http://studyassist.gov.au). For advice about whether you’re eligible for a FEE-HELP loan, please contact the FEE-HELP enquiry line on 1800 020 108.
Key dates for 2020

Term 1 2020 (T1): 17 Feb – 16 May 2020*
Term 1 begins 17 February
Term 1 fee payment deadline end week 1
Term 1 census date – (discontinuation without failure/financial penalty): 16 March 2020
Term break: 17 - 31 May

Term 2 2020 (T2): 1 Jun – 29 Aug 2020
Term 2 begins 1 June
Term 2 fee payment deadline end week 1
Term 2 census date – (discontinuation without failure/financial penalty): 28 June 2020
Term break: 30 Aug - 13 Sept

Term 3 2020 (T3): 14 Sept – 12 Dec 2020*
Term 3 begins 14 September
Term 3 fee payment deadline end week 1
Term 3 census date – (discontinuation without failure/financial penalty): 11 October 2020

*New applications will be accepted for commencement Term 1 and Term 3 only.

“...being online it provides the flexibility to learn around the demands of being a mother to three young children and full-time work commitments ... the structure of the course has enabled me to integrate learning around times that suit me.”

Miranda Hickey
Medical Manager - Pharmaceuticals Industry

“... The modules I undertook provided me with a comprehensive understanding of those issues and so much more, my plans include Nurse Practitioner or Midwifery Consultant... also being able to pay per module made the course affordable... the online discussions were very valuable providing a cross section of clinicians engaged in critical discussions...”

Louise Harper
Registered Nurse and Midwife
